OVERVIEW

Professional Summary

Full Stack Web Developer with hands-on MERN expertise (MongoDB, Express.js, React.js, Node.js) and a growing specialization in AI-augmented development — integrating tools such as Antigravity, OpenAI Codex, Qwen, and OpenCode into real production workflows. Currently an intern at Bano Qabil Incubation Center, building BQ-PLAY, a live cricket scoring platform with real-time updates.

A complementary 10+ year background in Accounting & Finance — including receivable management supervision at AK Electronics — brings analytical rigor, structured problem-solving, and financial reporting discipline to every engineering decision.

BACKGROUND

About Me

I'm a Full Stack Web Developer with hands-on MERN expertise — MongoDB, Express.js, React.js, and Node.js — and a fast-growing specialization in AI-augmented development. I integrate modern AI coding tools (Antigravity, OpenAI Codex, Qwen, OpenCode) directly into my workflow to design, build, and debug features faster without compromising quality.

I'm currently an intern at Bano Qabil Incubation Center, where I'm building BQ-PLAY — a live cricket scoring platform with real-time updates, an admin scoring console, and player statistics. I work in an agile team with Git/GitHub, design REST APIs and MongoDB schemas, and ship responsive React frontends end-to-end.

What sets me apart: 8+ years of professional experience in Accounting & Finance. I've built financial MIS dashboards, managed receivables across South Pakistan, and filed tax reports — so I bring analytical rigor, structured problem-solving, and a business mindset to every engineering decision.

Where I'm Headed

I'm on a trajectory from full stack development to AI-augmented engineering: building tools that combine the MERN stack with AI agents, prompt-driven workflows, and real-time systems — while keeping the financial discipline and analytical rigor I've carried from a decade in accounting.

EXPERTISE

Skills

Frontend

Building responsive, accessible interfaces

- HTML5 & CSS3
- JavaScript (ES6+)
- React.js
- React Hooks & Context API
- Tailwind CSS
- Responsive / Mobile-First Design

Backend & Database

APIs, auth, and data modeling

- Node.js
- Express.js
- MongoDB & Mongoose
- JWT / Session Auth
- REST API Design
- Third-Party Integrations
- Socket.IO

AI-Augmented Development

Shipping faster with AI agents in the loop

- Antigravity
- OpenAI Codex
- Qwen
- OpenCode
- Prompt Engineering
- AI Agent Workflows

Deployment & DevOps

From localhost to production

- Vercel
- Railway
- GitHub Actions
- Environment Management
- Serverless Patterns

Tools & Workflow

The daily toolkit

- Git & GitHub
- VS Code
- Postman
- npm
- Agile Collaboration
- Playwright

CAREER

Experience

Full Stack Web Development Intern — Bano Qabil Incubation Center*Apr 2025 – Present*

Building production MERN applications in an agile team — from schema design to deployment.

- Built and deployed BQ-PLAY, a live cricket scoring platform with real-time updates (MERN + Socket.IO)
- Designing REST APIs and MongoDB schemas for a 20+ route, 22-model backend
- Integrating AI coding tools (Antigravity, Codex, Qwen, OpenCode) into daily workflows
- Shipping responsive React frontends and collaborating via Git/GitHub in agile sprints

Accountant | Receivable Management Supervision — AK Electronics*Nov 2018 – Present*

Own full-cycle accounting and supervise receivable management — analytical rigor applied daily.

- Supervise receivable management, client reconciliation, and collection follow-up
- Prepare daily cash flow reports, general ledgers, and tax compliance filings
- Manage monthly balance reconciliations and client account management
- Build financial MIS reports and dashboards for senior management decision-making

Receivable Management Supervisor — Digicom QMobile (Pvt) Ltd*Mar 2014 – Nov 2017*

Led receivables reconciliation across South Pakistan — large-scale data accuracy under deadlines.

- Reconciled receivables across South Pakistan; produced DBC reports and sales-vs-return analysis
- Maintained Oracle ERP updates; built MIS reports and financial dashboards

Data Compilation Officer — Engro Fertilizers (Rahbar Project)*Apr 2018 – Jul 2018*

Ensured data integrity for a farmer-verification program.

- Verified farmer documents and land status records
- Maintained data integrity and compliance across the program database

WORK

Projects Overview

BQ-PLAY (CricAll)

LIVE

Live cricket scoring & tournament platform

Flagship full-stack project — real-time cricket scoring with public user app, admin scoring console, and Socket.IO backend. AI commentary via Anthropic Claude.

[GitHub](#) →**LowPriceMart**

IN PROGRESS

Full-stack e-commerce platform

Three-tier e-commerce: customer storefront, admin dashboard with Recharts analytics, JWT auth, Cloudinary uploads, Playwright e2e suite.

BQ-PLAY (CricAll) — Live Cricket Scoring Platform

Abid Ali Tanoli

Full Stack Web Developer (MERN)

MERN · AI-Augmented Development · REST APIs · Financial Analysis

My flagship full-stack project at Bano Qabil Incubation Center. A live cricket scoring and tournament platform with a public user app (match center, live scores, rankings, points tables, news, videos), a dedicated admin scoring console (ball-by-ball scoring, wagon wheel, pitch maps, DRS review, super-over and tie resolution), and a Node/Express + Socket.IO backend.

Key Features:

- Real-time score updates via Socket.IO (WebSocket) across user and admin apps
- Ball-by-ball live scoring console with full match setup wizard (format, XI, toss, openers)
- AI-powered commentary generation through Anthropic Claude
- Match detail pages: Live, Scorecard, Commentary, Partnerships, Graphs, Info tabs
- Series/tournaments, team & player profiles, rankings and points tables
- 22 MongoDB models and 20+ REST route groups on the backend
- Dark/light theme toggle in both frontends

Tech Stack: React, Redux Toolkit, React Query, Socket.IO, Node.js, Express, MongoDB, Tailwind CSS, Anthropic Claude API

[View Source on GitHub →](#)

LowPriceMart — Full-Stack E-Commerce

A complete three-tier e-commerce application: a customer storefront, a separate admin dashboard with sales analytics (Recharts), and a Node.js/Express backend with MongoDB. Authentication via JWT, image uploads via Cloudinary, transactional emails via Nodemailer, and Zod validation on every input — plus an end-to-end Playwright test suite.

- Separate user and admin React frontends with Redux Toolkit state management
- Admin analytics dashboard with charts (Recharts)
- JWT authentication, Cloudinary image uploads, Nodemailer email flows
- Zod validation across the full stack
- Playwright end-to-end test suite

Tech Stack: React, Vite, Tailwind CSS, shadcn/ui, Redux Toolkit, Recharts, Node.js, Express, MongoDB, JWT, Cloudinary, Nodemailer, Zod, Playwright

[View Source on GitHub →](#)

Event Organizer — Event Booking & Management Platform

A full-stack event booking and management platform built with React, TypeScript, Node.js, Express, and MongoDB. Feature modules for authentication, users, admins, events, and categories with JWT auth, a Vercel serverless entry point for the API, and a clean layered project structure.

- Auth module: register, login, JWT sessions
- User, admin, event, and category management modules
- TypeScript across backend and frontend
- Vercel serverless-ready API entry point

Tech Stack: React, TypeScript, Node.js, Express, MongoDB, JWT, Vercel

[GitHub](#) → [Live Demo](#) →

Tourist Places Guide — MERN Travel Guide

A MERN-stack tourist places guide with separate user and admin React (Vite) frontends connected to a Node.js, Express.js, MongoDB, and Mongoose backend. Covers full CRUD flows for places and categories with environment-based configuration.

Tech Stack: React, Vite, Node.js, Express, MongoDB, Mongoose

MILESTONES

Achievements

Shipped a real-time live-scoring platform end-to-end

BQ-PLAY: MERN + Socket.IO, 25-page user app, 20-page admin console, 22 models, AI commentary integration.

3 Bano Qabil technical certifications

Backend (Node/Mongo/Express), React.js, and Web Development fundamentals.

10+ years of professional financial & analytical experience

From receivable management across South Pakistan to full-cycle accounting and receivable supervision at AK Electronics.

Pioneering AI-augmented workflows

Integrated AntigraVity, Codex, Qwen, and OpenCode into real project workflows.

Tested production apps with Playwright

End-to-end test suites written for full-stack applications.
